## BILATERAL MEETINGS

Wednesday 10:00 - 16:00

**DESCRIPTION** Slovenian company Jagger d.o.o. is engaged in welding services in all process (WIG, MIG.MAG ...). We are specialists for complex welding and installation services in industrial facilities and power plants. With our own highly qualified staff, we can carry out complex tasks in the fields of energy, industry and transport. Welders and pipe workers have knowledge on isometry and hold appropriate and valid certificates in accordance with international standards for various materials and welding techniques, which are periodically renewed. We carry out the following welding processes: 111 REO (MANUAL ELECTRIC-ARC WELDING), 131 MIG (aluminium welding process), 135 MAG (solid wire welding process), 141 WIG (TIG) (black material welding), 141 WIG (TIG) (white material welding), 141/111 WIG (TIG) / REO. In company we have highly trained professionals as well as own production facilities with equipment for the manufacture of various metal structures. Our products are high quality.
